WHY CHOOSE REDW?

At REDW The Rogoff Firm, our technology group has substantial expertise in an extensive range of information security and business processes. If information is the heart of your business, technology is how information gets where it needs to be. Businesses are becoming more dependent on their technology and electronic commerce is the norm.

Because of this exposure, both business and personal data is at risk. The advancements in technology, combined with the changing rules, regulations, standards and market trends, have created a need for more IT risk assessments, IT audits and security assessments. Is your data safe?

The difference between our firm and others is the care and quality of the technology assessments and recommendations we offer for your consideration.

WHAT REDW CAN DO FOR YOU

Our professionals can help you in the following areas:

- IT Needs Assessments
- IT Risk Assessments
- IT Security Assessments
- IT Regulatory Audits (GLBA, HIPAA, SOX)
- SAS 70 Audits
- Business Continuity and Disaster Recovery Planning

OUR TECHNOLOGY CONSULTING STRATEGY

Our clients succeed because we do everything possible to help them reach their goals. We provide many customized services using a dedicated team of highly experienced technology

professionals and other industry experts. In addition, when our clients have needs that go beyond the realm of technology, we are able to integrate the full range of professional services of REDW into the engagement.

OUR PROMISE TO YOU

You deserve the best we have to offer in service, quality, and cost effectiveness. We work hard to be sure that's what you always get. There are no cookie-cutter solutions, and we won't treat your needs the same as those any other client. We promise to listen to you, and adjust our services and their delivery to meet your needs and objectives.
