

{ Financial Education }

America is in a financial crisis. Families are struggling to stay afloat. Consider the following:

- In 2005 Americans had a negative savings rate.
- Personal bankruptcies are at an all time high.
- Consumer debt is at a staggering level and increasing.
- Retirement plan participation is declining.
- Few of our educational systems teach even the basics of personal finance.
- Studies show that those with knowledge and control of their finances are happier and more productive in their communities and jobs.

» HOW WE CAN HELP

We can assist you in improving your employee's understanding of their financial lives. Research proves the financial stability of your employees has a direct and positive impact on production. - Retirement
- Insurance
- Investments
