

{ Software Solutions: Sage Abra HRMS }

» HOW CAN YOU KEEP DOING MORE WITH LESS?

As a human resource professional, you are constantly facing this dilemma. Workforce management is of critical importance, and resource utilization must walk a very thin line while you continuously attempt to manage your organization's greatest asset and investment — its employees. We can help you ensure government compliance, streamline benefits administration and manage employee information with Sage Abra HRMS.

Sage Abra HRMS is an award-winning human resources, payroll, benefits, training, recruiting, and compliance management solution for small and medium-sized organizations. The software is comprised of ten modules that provide organizations the ability to choose to integrate as many modules as are needed to effectively satisfy their unique management oversight responsibilities.

» OUR APPROACH

As business consultants and CPAs, we learn everything we can about your human resources and/or payroll requirements. We'll interview key employees to address concerns about your current work processes and software. If Sage Abra HRMS will solve those issues, we will demonstrate just how easy the software is to use and the benefits you'll derive from it. Knowing that business software can be a substantial investment, we want you to be comfortable with your decision before you purchase.

» RESULTS

Our prior to purchase research and demonstrations provide a smooth transition from your old work processes and software to Sage Abra HRMS. We work directly with your team to implement the software and train them so you'll retain the level of competency you've worked so hard to develop.

At REDW, integrity counts.
