FOR SMALLER BUSINESSES

In a smaller company, the Human Resources function is often an under-appreciated and under-staffed department. Maybe it's just you or another colleague managing day-to-day HR administration, employee attendance, compliance requirements, benefits enrollment and even payroll management. Whether you're an administrator or the CFO, we will consult with you on the best HRMS solution to fit your needs and your budget.

MANAGE EMPLOYEE INFORMATION

Track and report on employee data that is scattered across multiple systems. Spend less time handling paperwork so you can focus on more pressing priorities managing HR.

DEVELOP YOUR WORKFORCE

Improve workforce productivity and develop employees for current and future needs to remain competitive and meet company objectives.

ATTRACT & RETAIN

Quickly find and hire qualified employees for your open jobs. Manage and communicate competitive compensation and benefit packages that help attract and retain employees.

FOR MID-SIZE BUSINESSES

The HR department of a mid-size company is often looking for ways to improve the value of the HR function and optimize processes while reducing costs. More robust reporting requirements, automated benefits enrollment, employee self-service capabilities, and a constant eye on compliance regulations will help the HR Professional sleep at night.

PRODUCE ACCURATE AND TIMELY PAYROLL

Simplify federal, state and local taxes and meet payment deadlines. Employees audit your payroll quality every payday!

PROTECT YOUR COMPANY FROM RISK

Meet federal and state rules, regulations and reporting requirements to protect your company from fines and penalties. Avoid workplace issues that can result in employee lawsuits. Stay current with employment laws, regulations and reporting requirements including, EEO, FMLA, HIPAA, COBRA, OSHA, Workers Comp, I-9 and more.

IMPROVE PROCESSES

Improve employee processes across the company to make them more efficient so they support, rather than hinder, organizational development and growth.
